AI OPEN INNOVATION CHALLENGE 2026

◆ TEMPLATE PROPOSAL ◆

PROPOSAL WRITING GUIDELINES

- The proposal must be written in clear and easily understandable English.
- Use formal, concise language that gets straight to the point.
- Avoid excessive use of technical jargon without explanation.
- Focus on the clarity of ideas, logical solutions, and real impact, rather than just linguistic style.
- The proposal must follow the official template structure provided by the committee.
- Each section should be filled proportionally, not too long in one part and too short in another.
- Document format:
 - File format: PDF
 - File name: Team Name_Team Leader Name_Proposal AI Open 2026.pdf
 - Size: A4
 - Spacing: 1.15
 - Font: Times New Roman
 - Main font size: 12 pt
- Images, diagrams, tables, or illustrations are optional.
- Visuals should only be used if they help clarify ideas, not as decoration.
- All visuals must be: Relevant, easy to read, and given a title or brief description if necessary.
- References can be added at the end of the proposal document if quoting others.
- The completed proposal can be uploaded on the submission page in PDF format only.
- Participants can attach other relevant documents and/or demo/prototype links (optional).

Executive Summary Project

Explain the executive summary of your project, how it supports the Hackathon theme, and how it can have a positive impact on the company case provider. Be sure to include the problem statement that you are trying to solve with your innovative solution.

[Max. 150 Words]

PROBLEM STATEMENT

Selected Case Statement

Selected Sub-Case Statement

Main Objectives

Explain the main objectives and specific targets to be achieved from this innovation.

[Max. 200 Words]

PROBLEM DEFINITION

What is the main problem?

Your problem description should be specific, not too general.

[Max. 200 Words]

Who is impacted and to what scale?

Which stakeholders / industry are likely to be affected?

[Max. 150 Words]

Prove the problem

Data, reports, observations, regulations, or real-life experiences.

[Additional image / table, etc., is allowed]

[Max. 180 Words]

PROPOSED SOLUTION

Main Solution

Describe in general terms the solution you are proposing and how it works.

[Max. 200 Words]

Attachment Image / Illustration / Diagram

[if any]

How does the solution work?

Explain the process from input → process → output.

[Max. 200 Words]

IMPACT & OUTCOME

Key Benefits of Adopting the Solution

Describe the positive changes expected for users or stakeholders.

[Max. 200 Words]

Shorts and Mid-Term Outcomes

Describe the outcomes in the near future and in the next few months/years.

[Max. 200 Words]

INNOVATION & DIFFERENTIATION

What Makes Your Solution Different?

Explain the unique elements, innovations, or new approaches of your solution.

[Max. 200 Words]

Positioning of the Solution Compared to Existing Approaches or Products

If there are already similar solutions on the market, explain how your solution complements, improves upon, or surpasses those approaches.

[Max. 200 Words]

TECHNICAL APPROACH

Main Solution

List the key technologies or approaches (e.g., AI, web applications, mobile, data analytics, automation).

[Max. 150 Words]

Technology Selection and Implementation

Explain why you selected that technology and how to use it.

[Max. 150 Words]

Solution Algorithm

Describe the AI/ML and/or blockchain algorithm you will use.

[Max. 150 Words]

TECHNICAL APPROACH

Primary Data or Input Used

Explain what data was used and where it came from, as well as the quality and reliability of the data.

[Max. 200 Words]

Security and Scalability Considerations

Briefly describe how the solution addresses data security and potential future development.

[Max. 150 Words]

IMPLEMENTATION FEASIBILITY

Invention Status

What stage is the invention currently in? For example, idea / mockup / POC / prototype / pilot project?

Is the Innovation Realistic to Build?

Explain why this solution makes sense for your team to implement.
[Max. 150 Words]

Development Stages

Outline the implementation plan stages from start to MVP or pilot.
[Max. 180 Words]

IMPLEMENTATION FEASIBILITY

Business Model and Sustainability

Describe your solution's business model in the form of a business model canvas, and explain it in more detail.

[Max. 200 Words]

ATTACHMENT & REFERENCE

- Attach relevant mockups/POCs/prototypes/pilot projects related to your project in the form, if available [not mandatory].
- Attach any information that you have not explained in the description above.
- Provide references for any sources you have cited.
